01 PROFILE

I am a skilled blockchain developer in developing decentralized applications (dApps) on blockchain platforms. I have a strong background in smart contract development, blockchain architecture. I am committed to staying up-to-date with the latest industry trends and technologies, and I am passionate about using blockchain technology to create innovative solutions to real-world problems.

What i can provide -

- Designed and developed a decentralized web App on the Ethereum blockchain using Solidity, Ethers.js, and Hardhat
- Implemented a robust smart contract system to enable secure transactions and dispute resolution
- Integrated the App with various external APIs to enhance user experience
- Conducted code reviews, testing, and documentation to ensure high-quality code and project delivery
- Developed smart contracts to enable secure and transparent identity verification processes

02 EDUCATION

Jun 2020 — Jun 2024

Thrissur

Royal College Of Engineering And Technology

B.Tech

03 SKILLS

HTML & CSS

MongoDB

Python

React

Ethereum

JavaScript

Node.js

Solidity

04 HOBBIES

-Attending conferences and meetups, Developing blockchain-based applications , Writing about blockchain, Workouts, Reading, Exploring

05 COURSES

Dec 2022 — Jan 2023

Learn Blockchain, Solidity, and Full Stack Web3 Development with JavaScript – 32-Hour Course at freeCodeCamp

Aug 2022 — Aug 2022

React Developer Crash Course for Beginners at udey

Sep 2022 — Sep 2022

Practical Next.js & React Course at usey

Mar 2023 — Mar 2023

Build An NFT Marketplace From Scratch - Blockchain DApp at udey

06 PROJECTS

- Token-swap App
- NFT-MarketPlace
- Web3 RealEstate App
- Web3 Ecommerce App
- CrowdFunding App
